

Local Orthodontists Present At Damon Forum On New Orthodontic Technology

Dr. Roger Bandeen and son Dr. Tim Bandeen (orthodontist in Battle Creek, Michigan) were invited to do a presentation on Early Treatment with Damon at the 2009 Damon Forum in Scottsdale, AZ on Friday the 23rd of January 2009. Over 1000 orthodontists were present from the US and around the world.

Roger L. Bandeen, D.D.S., M.S.
Timothy C. Bandeen, D.D.S., M.S.

This 90 minute Power Point presentation was on a unique Early Treatment Protocol that allows the orthodontist to better take advantage of the ultra low force/low friction features of the space-age bioadaptive orthodontic technology available using Damon braces and super-elastic orthodontic wires. When indicated, this protocol allows the orthodontist to provide early treatment in much less time and with much less discomfort than ever before possible.

For more information on this treatment contact Roger Bandeen at Bandeen Orthodontics, 8865 Professional Drive, Cadillac. (231) 876-2530. www.bandeenbraces.com
